

KI KAKADU JUICE FACT SHEET

There are pre-historic plants still growing abundantly in Australia's wild Outback of such nutritional complexity and concentration to almost defy belief. Kakadu Plum for example is 150 times more nutritionally dense than goji berries, contains 700% the quantity of antioxidants found in blueberries and is a rich source of folic acid and iron.

5 of Australia's most potent Natives are complimented by a selection of unique plant-foods in Kakadu Juice, a masterfully blended, lusciously rich, full-bodied liquid banquet boasting an exciting spicy-chocolate taste your body will love you for.

This natural cocktail of essential nutrients supplies an abundance of slow-release energy, vitamins, minerals, antioxidants, enzymes, bioflavonoids, chlorophyll, protein, essential fatty acids (3, 6 & 9) and fibre for fortifying the diet *Nature's way - from cold-processed whole foods.*

It may be taken alone or mixed with meals and drinks to add a delicious *bush-boost*. Its **safe** for kids, elderly, expectant mothers and those suffering poor health including diabetics.

Imagine having ALL of these ingredients in YOUR diet today!

A favourite healthy food of the Aboriginal people. Holds the World Record for Vitamin C content. Is a *phytonutrient feast* full of antioxidants, folic acid and iron.

Kakadu plum

Hailed as the World's strongest antioxidant food. A polygodial-rich food traditionally used as a bush medicine by indigenous Aboriginals of Australia.

pepperberry

Has a sweet peach flavour used in gourmet cuisine. Contains vitamins, minerals & unique oils such as Santalbic Acid - studied by Deakin University.

quandong

A very close rival to the pepperberry for the title of strongest antioxidant. Subtle plum/pine flavours plus vitamin C make it a culinary favourite and bonus for Kakadu Juice!

Illawarra plum

A tasty bush flower used in jams and sauces. A truly rich antioxidant food with incredibly high levels of the 2 most active anthocyanins.

wild rosella

A natural cornucopia of nourishing vitamins including A, C, E & B, antioxidants, amino acids, essential oils, anti-inflammatories & proteoglycans.

goji

A feast of flavonoids, omega 3, 6 & 9 oils, vitamins & sterols. A health-food favourite of the native South Americans with a taste like chocolate cherries!

acai

Delightfully sweet, slightly sour with antioxidant power! Also a source of mallic acid and numerous bioflavonoids.

cherry

A delicious fruit full of polysaccharides, anti-inflammatories, vitamins and minerals plus over 40 different highly concentrated antioxidant Xanthones.

mangosteen

A well known health-food full of flavour, fibre, phenols, vitamin C and potent antioxidants including resveratrol and numerous bioflavonoids.

blueberry

Juicy and sweet with an abundance of anti-inflammatories and many antioxidant bioflavonoids including ellagic acid.

pomegranate

A powerful herb, famous for its copious catechins, vitamins and minerals plus ECGC (an even stronger antioxidant than vitamins E & C).

green tea

A wonderful source of omega 3, 6 & 9 oils, lignans (numerous health benefits) and rich in healthy plant proteins important for a naturally nutritious diet.

flax seed

A concentrated green food rich in enzymes, proteins, antioxidants, vitamins, minerals and chlorophyll which may be lacking in modern processed food diets.

barley grass

Grape seeds contain numerous fatty acids and antioxidants including resveratrol and the OPC's which are strong and versatile antioxidants.

grape seed

feel better

look younger

live longer

Sun-drenched Superfoods

A New Australian Health Product containing *Native Bush Foods* could make many modern-day nutritional supplements obsolete!

Superfood or Supernatural?

Scientists from Sydney discover a Native Australian Bush Food that is 150 TIMES more nutrient dense than Goji Berries*, contains over 700% the level of antioxidants in Blueberries** and is a highly rich 'natural' source of Folic Acid and Iron!

Professor Brand-Miller, the pre-eminent authority and author on glycaemic index is also to thank for discovering that Kakadu Plum is the World's richest natural source of Vitamin C. At up to 450mg of Vitamin C per gram of dry fruit, that is over 150 times the concentration found in dried goji berries, over 200 times more than blackcurrants and 900 times more than oranges.

Kakadu Plum is one of 5 of Australia's most potent Natives selected for careful wild-harvesting, cold-processing and smooth blending to maintain maximum nutrient content in Australia's very own super whole-food beverage, Kakadu Juice.

Enjoying a serving or two of Kakadu Juice each day is the sensible and affordable way to good health and something that Australians of every age have fallen in love with. Some simply enjoy knowing they are getting their vitamins, minerals and antioxidants from real plants while many others are reporting health breakthroughs previously unattainable with other products.

"I own a large Wellness centre with many therapists and have seen every new health product in the last 15-years. Kakadu Juice is without doubt the best quality whole food health product I've ever seen. It's exactly what I was wanting to offer our patients. A great Australian product, I take it every day."

James QLD

"I must share this with other hayfever sufferers. I've suffered chronic hayfever for many years especially after moving to the country. I was amazed after just a few days on Kakadu that my hayfever cleared... and hasn't returned since."

Jan SA

"I've been taking Kakadu for 3 weeks now. I have more energy and no longer get bad digestive pain, diarrhoea or cramps. After 30ml of Kakadu all the pain goes in a few minutes. I've had no problems since!"

Adam WA

"I've tried no less than 10 juice products and this is by far the best. I used to have strong allergies to cats, dust and pollen.

Dan SA

I didn't take Kakadu for those reasons but was elated after 2 weeks of testing to discover my allergies were gone. 3 months later...they're still gone."

"Progress! After 2 days on KJ my lung function has gone from a peak flow of 350Lmin⁻¹ to 450, the raw burning breathing pain, headaches and persistent cough have gone.

Sandy QLD

Day 5... My lung function's still at 450 and due to today's blood tests, my doctor has now taken me off antibiotics and ventolin. I feel so young and energetic!"

Dr. George Kowalski

President - Kakadu International
Formulator - Kakadu Juice
Helicopter Pilot

"Creating a Super-Food beverage from Australian Natives has been a desire of mine for a number of years. Research has shown many Australian natives to be nutritional World Record holders.

Over the years, I have learned from the indigenous people I visit on my voyages. I have also observed other Australian scientists make exciting discoveries about the value of our Native plants.

So, in collaboration with Dr. Cherikoff I set about planning a food beverage to contain these very same fruits, which contain optimal amounts of antioxidants, vitamins and minerals.

Kakadu Juice is that product.

Having over 25 years experience in formulating health products I am certain that Kakadu Juice will become a very popular new-age health product. I hope you enjoy it as much as I do.
